

Numeracy Coordinates Task

Task 1: Remind yourself of coordinates by visiting the BBC bitesize link below and completing the examples.

Remember coordinates go along the corridor first then up the stairs.

Task 2: Have a go at the coordinates game Alien Attack see the link below.

Task 3: Find attached a PDF battleships game to play (alternatively you could draw your own coordinate grids to use).

Rules:

You need 2 players to play this game, each with their own grid.

Both players draw the ships on their own grid.

Each player takes it in turn to guess where the other players ships are located by calling out coordinates.

First player to sink (guess) all ships wins!
