

Staying Home

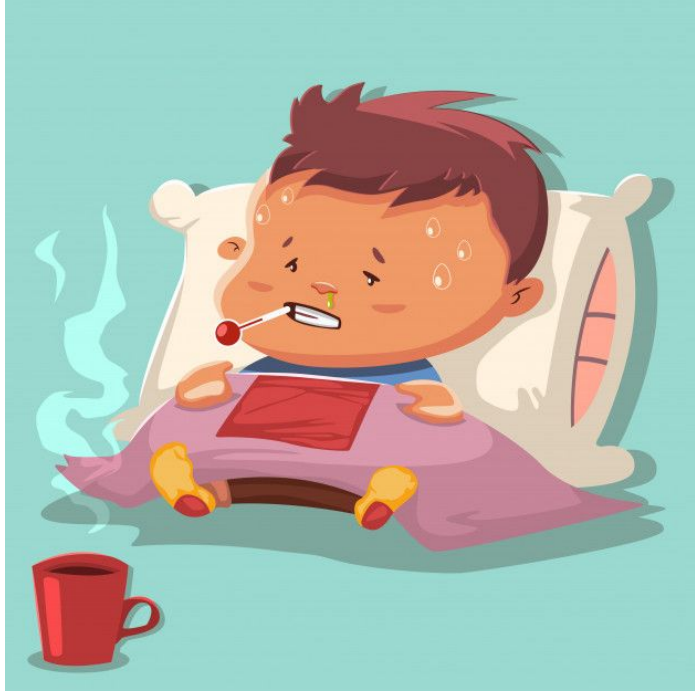

Why do I have to stay home?

Sometimes people get ill.
Little things called germs can make people ill.

When people get ill, they need to stay
home. This means the germs don't spread.

Germ called Coronavirus are making some people ill just now.

So, it is important I stay in my house and garden to help stop the germs from spreading.

This keeps me and my family safe and healthy.

Nursery is closed.
My friends and Nursery staff are at home with their families too.

I miss seeing my friends at Nursery but I know they are safe at home.

I miss seeing my key worker too.
I know I will see them when Nursery is open again.

I know when the Coronavirus germs are gone, I will be able to go back to Nursery again.

I will be excited to see my friends and all the Nursery staff. They will be excited to see me too!
