

Tally Table Activity

Week Beginning 20th April 2020

Learning Intention: To collect, sort and organise information.

Success Criteria:

- ★ I can think of a question to collect information about.
- ★ I can use tally marks correctly.
- ★ I can use a table to help me organise information.

Tally Table Activity

LI: To collect, sort and organise information.

Your
Task

Carry out a survey on a subject of your choice using a tally table to show your results.

For example, when out on a walk tally the number of different colours of cars you see or tally the number of different types of toy you have. Be creative!

Here's an example ...

What is the most popular colour of car on my street?

Car Colour	Tally	Total
Red	III	8
Blue	II	12
White	I	6
Other		4

Every time you see a car that is one of your colours, give it a tally mark I . Remember, each fifth tally should make a gate |||| = 5 .

A blank template is provided in the file for you. Keep your results as we'll make a bar chart from them next week!

There are some tips on the next page

Tally Table Activity

LI: To collect, sort and organise information.

Some Tips!

Think about 4 or 5 categories for your subject. For example:

- Colours of cars – red, blue, white, black and yellow, etc.
- Types of toys – books, games, animals, construction, dolls, etc.
- You can always have an ‘other’ category for things that don’t fit.
- You could draw a picture to represent each category.

Every time you count something in one of your categories give it a tally mark I .

Remember, each fifth tally should make a gate $\text{||||} = 5$.

Remember this rhyme to help you: 1, 2, 3, 4, number 5 shuts the door!

Have fun and do your best!
