

Split Strategy

There are many strategies to use when working with numbers and it's important to remember that you should use the strategy that works best for you.

The following 3 videos explain how to use the split strategy for working out addition and subtraction sums. Once you've watched each video, have a go at completing the sums using this strategy.

[Watch video for split strategy.](#)

Try to complete these sums using this strategy.

$$24 + 32 =$$

$$17 + 21 =$$

$$81 + 16 =$$

$$56 + 41 =$$

$$45 + 33 =$$

[Watch video for split strategy with regrouping \(addition\)](#)

$$147 + 274 =$$

$$456 + 376 =$$

[Watch video for split strategy with regrouping \(subtraction\)](#)

$$654 - 467 =$$

$$375 - 286 =$$
