## Year 3: Week 3, Day 5

## Match analogue and digital clock times; ${ }^{1 / 4}$-hour increments

Each day covers one maths topic. It should take you about 1 hour or just a little more.

1. Start by reading through the Learning Reminders. They come from our PowerPoint slides.

2. Tackle the questions on the Practice Sheet. There might be a choice of either Mild (easier) or Hot (harder)!
Check the answers.

3. Finding it tricky? Answer some questions based on the A Bit Stuck? activity from yesterday.

4. Have I mastered the topic? Some questions to Check your understanding.

| 20 past 1 |  |  |
| quarter to 6 |  |  |

## Challenge

Kayla started to draw the hands on this clock to show quarter past three, beginning with the hour hand.
Is she going to get it correct?

Follow-up questions

Focus of activity: Telling the time to the quarter hour on analogue and digital clocks.

Cut out the 8 cards, then match pairs of analogue, digital and written times:

| $6: 45$ | quarter past four |  |
| :---: | :---: | :---: |
| nine o'clock |  | half past two |
|  | quarter to seven |  |

## Check your understanding Questions

Draw the hands on a clock to show:
a) Ten past ten
b) Ten to ten
c) 11:45
d) Quarter past 3
e) 12:40

If the clock hands make a straight line on an analogue clock (pointing away from one another, not overlapping), write some of the times that the clock might be showing.

## Check your understanding Answers
