

## Using Venn diagrams

Venn diagrams show the relationships between a collection of things (numbers or objects, for example) in a logical way.

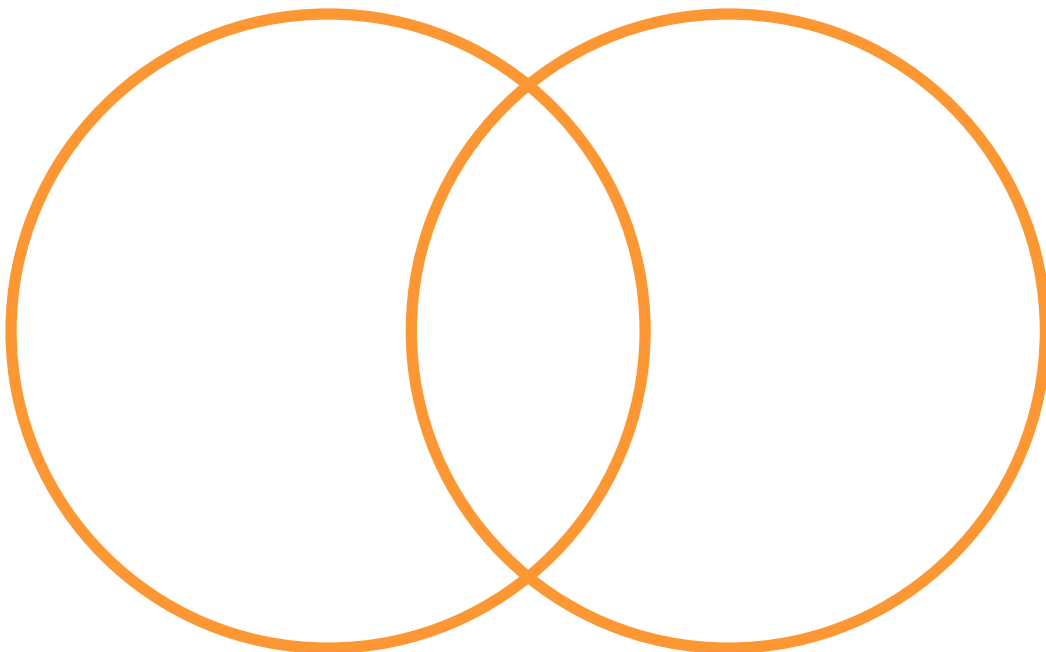

The numbers in the left circle follow one rule; the numbers in the right circle follow another rule. The numbers in the middle follow BOTH rules.

Can you sort these numbers into the Venn diagram below?

12 5 6 25  
10 13 15

Numbers in 5x table

Even numbers

Answers: 5, 25 and 15 in the left hand circle. 10 in the right hand circle. 6 and 12 in the middle. 13 on the outside.
