

LI: to ask and answer key questions to extract key information from a data set

EXTRA HOT

Look at the bar chart provided. Write the answers in full sentences in your jotter.

e.g., The least popular month was _____ because _____

1. Draw a tally chart to show the data which was collected.
2. Which month had the most visitors? How many?
3. Which month had the least visitors? How many?
4. How many more people visited the beach in July than January?
5. How many people visited the beach altogether in the months of June, July, and August?
6. Which two months had 26 visitors in total?
7. Which month had 12 less visitors than September?
8. How many less people visited in February than March?
9. How many less people visited in April than August?
10. Why do you think more people visited the beach in July and August than in January and February?
11. How many people altogether visited the beach that year?

Extension: create two more of your own questions and record them in your jotter. Remember a question always has a ? at the end.
