

LI: to ask and answer key questions to extract key information from a data set

HOT

Look at the bar chart provided. Record your answers in your jotter.

1. Draw a tally chart to show the data that was collected.
2. Which two fruits were the most popular? How do you know?
3. Which fruit was the least popular? How do you know?
4. How many children altogether liked Apples, Bananas, Pears and Strawberries?
5. How many more children liked Oranges than Pears?
6. What was the difference between the number of children who liked Apples and the number of children who liked Plums?
7. Which fruit had 6 votes?
8. Which fruits had 10 more votes than Plums?
9. Which fruit had one less vote than Apples and Oranges?
10. How many children in Primary 4 voted altogether?

Extension: create two more of your own questions and record them in your jotter. Remember a question always has a ? at the end.

Primary 4's Favourite Fruit
