Home Learning Grid - Term 2 2020

<p>Literacy - Reading</p> <p>In class we have been developing a range of comprehension skills, including understanding unfamiliar words and summarising a text.</p> <p>Using a book of your choice, write a summary of what happens in a chapter of your book (or in the whole book if it is a short book). You should do this after reading the chapter/ book. Remember a summary should be brief and contain the main points. You can write your summary in your jotter.</p> <p>As you read, note down any unfamiliar words you come across. See if you can work out the meaning of the word by reading around it in the text. Check your understanding with an adult afterwards.</p>	<p>Literacy - Writing</p> <p>In class we have been learning about synonyms and using these to up-level and improve our writing.</p> <p>First, explain to an adult at home what a synonym is.</p> <p>Have a look at the sentences provided on the writing task sheet (this can be found on Google Classroom - you can type into the document, print it off, or write the sentences in your jotter).</p> <p>Each sentence has a word underlined. For each of these words, think about what synonyms could use instead and write these in the space provided.</p> <p>Then, choose your favourite synonym for each underlined word and re-write the sentences using these synonyms in place of the underlined words.</p>	<p>Numeracy / Maths</p> <p>Log onto Sumdog. A competition has been set up which covers many of the numeracy and maths topics that have been covered so far in primary 5. This will be good revision and practise and will include questions on addition and subtraction, multiplication and division, money, and time.</p>
<p>HWB</p> <p>Think back to the learning we did on the Eatwell Plate and eating a balanced diet.</p> <p>Choose 5 items of food from your house which have food labelling with nutritional information visible. Looking at the nutritional information, identify how many calories, how much sugar, and how much fat each item contains per portion.</p> <p>Which item has the most/ least calories per portion? Which item has the most/ least sugar per portion? Which item has the most/ least fat per portion?</p> <p>Did any of the results surprise you?</p>	<p>Learning Across the Curriculum</p> <p>Science - In class we have been exploring forces, including friction.</p> <p>Log onto Education City and head to your homework section. You will find a homework city called p5 science - forces. Have a look at the content here. You will find an activity about investigating the effect of friction on motion, a forces glossary, and an activity sheet to explore your knowledge of friction. This sheet can be printed from Google Classroom if you like, or you can answer the questions in your jotter (and upload a photo of this if you can).</p>	<p>Learning Across the Curriculum</p> <p>Music - listen to "Winter" from "The Four Seasons" composed by Antonio Vivaldi.</p> <p>https://www.youtube.com/watch?v=ZPdk5GaIDjo</p> <p>This is a very famous piece and is an example of "programme" music - music that tells a story.</p> <p>During or after listening to the piece, write down a list of words and phrases that come into your mind. What wintery weather might the music be describing? What images does it make you think of?</p> <p>To extend your ideas further, create a piece of artwork inspired by the music and your ideas. Share a picture of this if you can on Google Classroom.</p>
