

## **New Google Account**

Dear Parents/Carers

Midlothian's Digital Learning Team have made changes to where children and staff access Google, including Google Classroom. Children will now access their Google Classroom and other resources in Google Workspace directly through a new Google account and not through Glow as they did previously. For children to sign in to their new Google account which has been set up for them they should go to [classroom.google.com](https://classroom.google.com), then type in their unique Google e-mail address and password.

When your child has signed into their new account they can access their Google Classroom for this year. To do this, click on the app launcher (group of squares) and select Google Classroom. This will link to the Google Classroom home page where you will see the Google Classroom invite(s) for this year for your child.

If you need any support with accessing or using the new Google account, children can ask their teacher or Mrs Hinton (Digital Leader for Loanhead). Parents/carers can contact Mrs Hinton by e-mailing [k.hinton@midlothian.education](mailto:k.hinton@midlothian.education)

Kind regards

K Hinton - Digital Leader at Loanhead Primary
