

Home Learning from Monday 4th May

Primary 1

Data Handling with Lego

Make a block diagram of how many times you do each of the following activities in the week (you choose):

-Go for a walk

-Read

-Bake

-Arts and craft

-Watch a film

-Number activities

Choose a colour of Lego for each activity and make a 3D graph.

Once you have completed your block diagram, ask an adult to ask you some questions about it.

Example Questions:

What activity did you do the most?

What activity did you do least often?

How many times did you do ...? (choose specific activities)

Guess My Word

Ask your grown up to give you clues to describe a word. For example: 'this is a farm animal, it goes baa.'

Use your phonics knowledge to write the word down (on paper, on a whiteboard, build with magnetic letters, write it with sparkly pens etc.)

Measuring with Feet

Draw around your foot onto a piece of paper, you might need some help from a grown up, then cut it out.

Using your foot as the unit of measure, measure different things inside and outside your house.

Measure the length of your sofa, how many feet did it take to reach from one side of the garden to the other? What is the smallest/biggest thing you can find to measure?

Make a list of all the things you measure.

Reading Scavenger Hunt

Find and look through a book with words and pictures. Can you draw your favourite part from a book?

Challenge:

Can you then write a sentence about your picture?

Find the Number 9

Numbers are all around us. How many different places can you see the number 9 in and around your home?

Draw or write some of things that have a number 9 on them.

Can you tell an adult some things you know about the number 9?

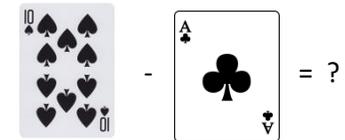

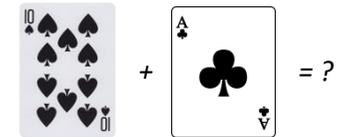

For example: 'I know that $6 + 3 = 9$ '
How many more facts can you come up with?

Playing Card Number Sentence

Take out all the face cards but keep the ace to represent 1.

Place the cards in the middle of the players. Take turns to turn over 2 cards and make a number sentence e.g.

Write each calculation down.

2-a-Day

Choose one of the sounds we have learned. Think of as many words as you can containing that sound. Choose two of the words and write a sentence for each one. Draw and colour a detailed picture to go with each sentence.

Healthy Meal

Help prepare a healthy meal for your family. Or help to put together a health packed lunch to enjoy in the garden. Can you draw or write a list of what you included?

Go Noodle!

Why don't you create your own GoNoodle account and see how many monsters you can train up! Relive some of our favourite songs and dances like 'Milkshake' and 'Pop Se Co' and try out some new ones.

<https://www.gonoodle.com/>

Out of the Ark

Join 'Out of the Ark Music' at home as they bring you a new song for every day of the week. You might recognise some old favourites as well as learning something new. They have different activities linked to each song for you to explore.

Mental Maths

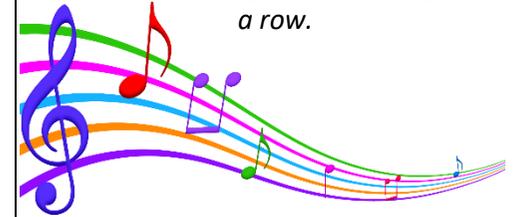

Being able to recall addition and subtraction facts quickly is a great skill! Can you use your number knowledge to help you complete the 'Mental Maths Train?'

This game can be found on 'Top Marks' <https://www.topmarks.co.uk/maths-games/mental-maths-train>

You can practice addition and subtraction calculations whilst also setting your own challenge and difficulty. Good Luck!

Musical Words

Write tricky words or sounds onto a piece of paper and scatter them around the room. Play music and dance around them. When the music stops jump onto the nearest word or sound and shout it out as quickly as you can! You could also lay them out in a grid and try to get 4 in a row.

Make a Positivity Jar

Decorate an empty jar and every day try to write down at least one positive thing to put into the jar. It could be something fun you did, something you learned, a poem, something someone said, a great book you read, a goal you achieved, a new skill you practised, something delicious you ate, something you are thankful for etc.

Shadow Drawing

Let's take advantage of this great weather we have been having. Using toys and objects from around the house place them in the sun and put a piece of paper behind them so that you can draw round the shadow. Leave the object where it is and observe the shadow throughout the day.

Key Questions:

How does the shadow change if you rotate the object?
Is the shadow different at different times of the day?

My Life (so far) Timeline

Have a go at creating a 'My Life' timeline about your life so far, you can ask an adult to work with you on this as you might not remember things from when you were younger.

You could include things like; the year you were born, holidays, birth of younger siblings, first day at school, special occasions and achievements. Make sure you put the events in chronological (time) order.

Five Senses Scavenger Hunt

Using all 5 of your senses, can you find an item or object for each of the boxes in the scavenger hunt printable provided? You can look for these items in your house or garden or when you are out for a walk. Draw a picture of what you find.

My Five Senses Scavenger Hunt

Something smooth

Something rough

Something that makes a noise

Something round

Something yellow

Something that came from a plant

Something that has a smell

Something long

Something man-made

Something soft

Something you can eat

Something red
