

COP26 Challenge

We have been working on a challenge to design a habitat for the future. We were tasked with designing a sustainable and environmentally friendly hub, where humans and nature could cohabit successfully. The children have worked extremely hard on designing and building their designs from Lego and writing presentations to share their ideas.

Hockey

We have been learning some hockey skills in P.E this term. The children have demonstrated how to hold a stick effectively as well as dribble, tackle and pass accurately.

P7 Campaigns

P7 worked very hard on their Head Boy and Head Girl campaigns and House Captain campaigns. They prepared speeches independently, made eye catching posters and recorded themselves using the microphones and the green screen. Well done to Keeva, Alex, Charlie and Sol on their achievements. House Captains to be confirmed!

Numeracy

We have enjoyed working collaboratively on maths challenges this term and have been applying our numeracy knowledge to solve problems, especially related to long multiplication and BODMAS.
